✉ shrutikaghule20@gmail.com  [Shrutikaghule](#)  [shrutika-ghule](#)  [Portfolio](#)

Education

Vishwakarma Institute of Information Technology

Artificial Intelligence and Data Science — CGPI-8.38

2021-2025

Pune, Maharashtra

Dr. Ambedkar College

Higher Secondary Certificate — Examination Score - 93.67%

2020-2021

Nagpur, Maharashtra

Technical Skills

Languages: C, C++, JavaScript (ES6+), TypeScript, Python, SQL (PostgreSQL), Prisma ORM.

Frontend: React, Next.js, Tailwind CSS, Redux, Material UI, ShadCN UI, Framer Motion, TanStack Query

Backend & APIs: Node.js, Express.js, REST APIs, WebSockets, Authentication, Webhooks, Python, RAG, LLM integration

Developer Tools: Git, Docker, npm, Postman

Experience

Anervea.ai (Growman Group)

Nov 2025 – May 2026

Frontend Developer

Pune, Maharashtra

- Built end-to-end scalable apps with **Next.js 15 & Redux**, delivering 16+ features on schedule and raising user engagement.
- Optimized application performance** by integrating **WebSockets** for real-time connectivity and **TanStack Query** for advanced caching, reducing page load times by **40%**.
- Engineered **Python RESTful APIs** and a foundational **RAG pipeline**, improving backend efficiency and data retrieval relevance by **30%**.
- Developed responsive, production-ready UIs from Figma designs using **ShadCN UI**, **Tailwind CSS**, and **Framer Motion**, reducing development time by **25%**.
- Managed project delivery**, utilizing **Docker** and **CI/CD** within an **Agile** framework to ensure reliable, on-schedule production deployments while actively collaborating in **Agile ceremonies** to align technical goals with business needs.

Hackveda Ltd

Jan 2025 – May 2025

Data Analytics Intern

- Built **machine learning models** for churn prediction and market basket analysis.
- Developed an **interactive analytics dashboard** using **Dash**, **Plotly**, **Flask**, and **SQL** for real-time insights.
- Automated data pipelines with **Python**, **web scraping**, **API integration**, and **SQL querying**.
- Performed **EDA**, **data preprocessing**, and **debugging** to ensure clean, high-quality datasets for modeling.

Atlas Copco Group | Detection of Trademark Infringement

July 2024 – Dec 2024

ML intern

- Developed a system to **detect counterfeit logos** from product imagery through image preprocessing, logo extraction, and similarity analysis.
- Evaluated multiple pretrained CNN architectures** (ResNet50, Siamese Neural Network, VGG16, EfficientNet) to improve classification and retrieval accuracy.
- Deployed a Streamlit app for logo authenticity prediction.

Creator Research Pvt Ltd

May 2022 – Aug 2022

Frontend Developer Intern

- Built a user-friendly educational portal connecting teachers and students in an organized digital environment.
- Collaborated on improving UI/UX design to boost user engagement and retention.

Projects

Mobile App Generator | Next.js, Bun, Redis, Docker, PostgreSQL, LLM Integration, Clerk Auth

- Developed a platform that **generates mobile applications** from user prompts.
- Built a **worker-based architecture** to process queued requests and generate code artifacts dynamically.
- Integrated **Clerk** for secure authentication, session management, and user project isolation.
- Used Docker and Redis for **containerized deployments** and **efficient state management**.

Payment Gateway System | Next.js, TypeScript, Tailwind, PostgreSQL, NextAuth, Prisma

- Developed a high-performance payment orchestration layer to simulate **real-time transactions** between users and banking endpoints.
- Developed a **webhook handler** to manage transaction status updates with **debugging and issue tracking**.
- Integrated NextAuth for **secure user authentication** and role-based access.
- Utilized Dockerized PostgreSQL and Prisma ORM for **scalable backend development**.

Specialization

CS50's Understanding Technology (By EDX and Harvard)

IBM Full Stack developer (By Coursera IBM)

Algorithms Part I & II (By Princeton University)
